# Mastery Grids

This tool is a visualization of your progress in a set of content organized in topics.

These cells shows your progress in the topics of the course

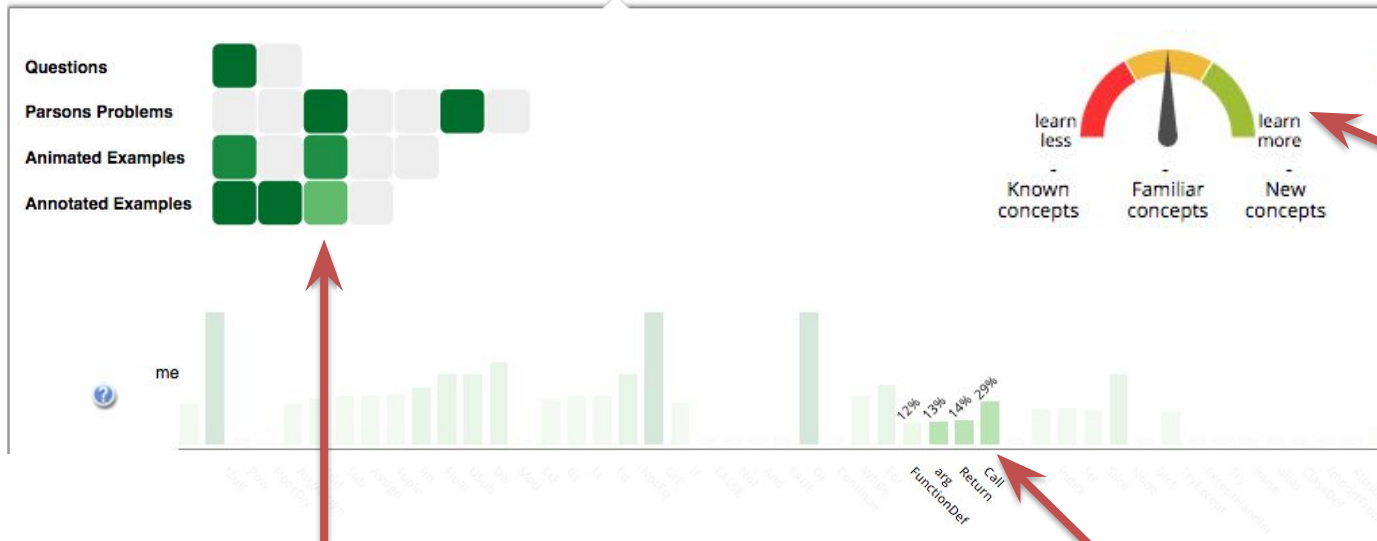

Each topic has several concepts associated to it. Mouseover a topic to highlight its concepts

This bar chart shows your progress in the concepts of the course content

# When you click in a topic cell:

An overlaid pane opens indicating which topic you are inspecting (in this case the topic "Functions")

This gauge estimates the how much you can learn in the selected activity. You will probably learn more in activities that have more *new* concepts

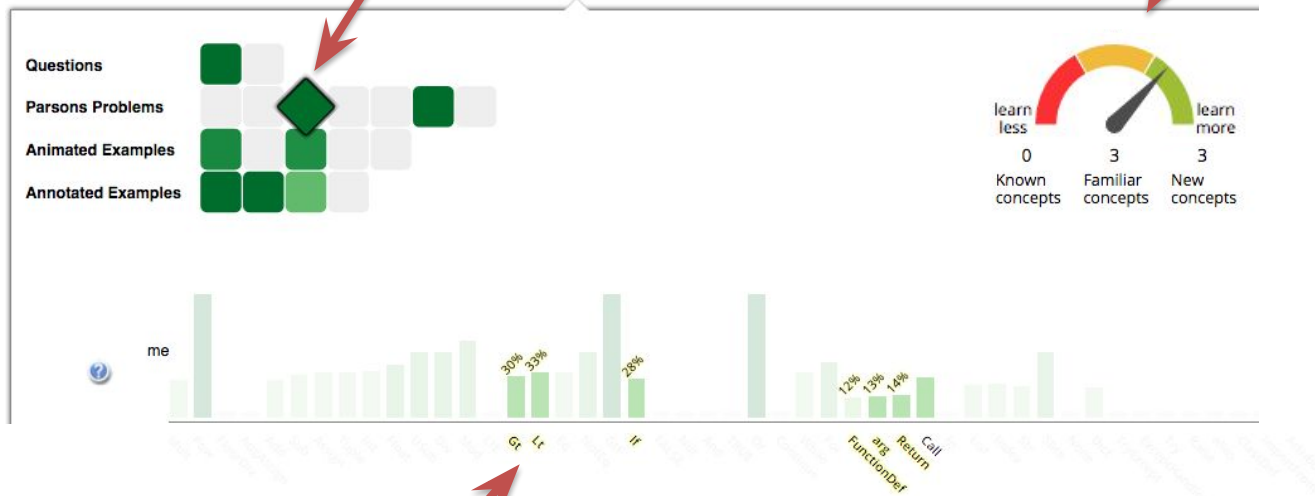

These are the "activities". As you complete them, you gain progress and cells become greener, and bars greener and taller.

The concepts within the selected topic are highlighted

# When you mouseover an activity

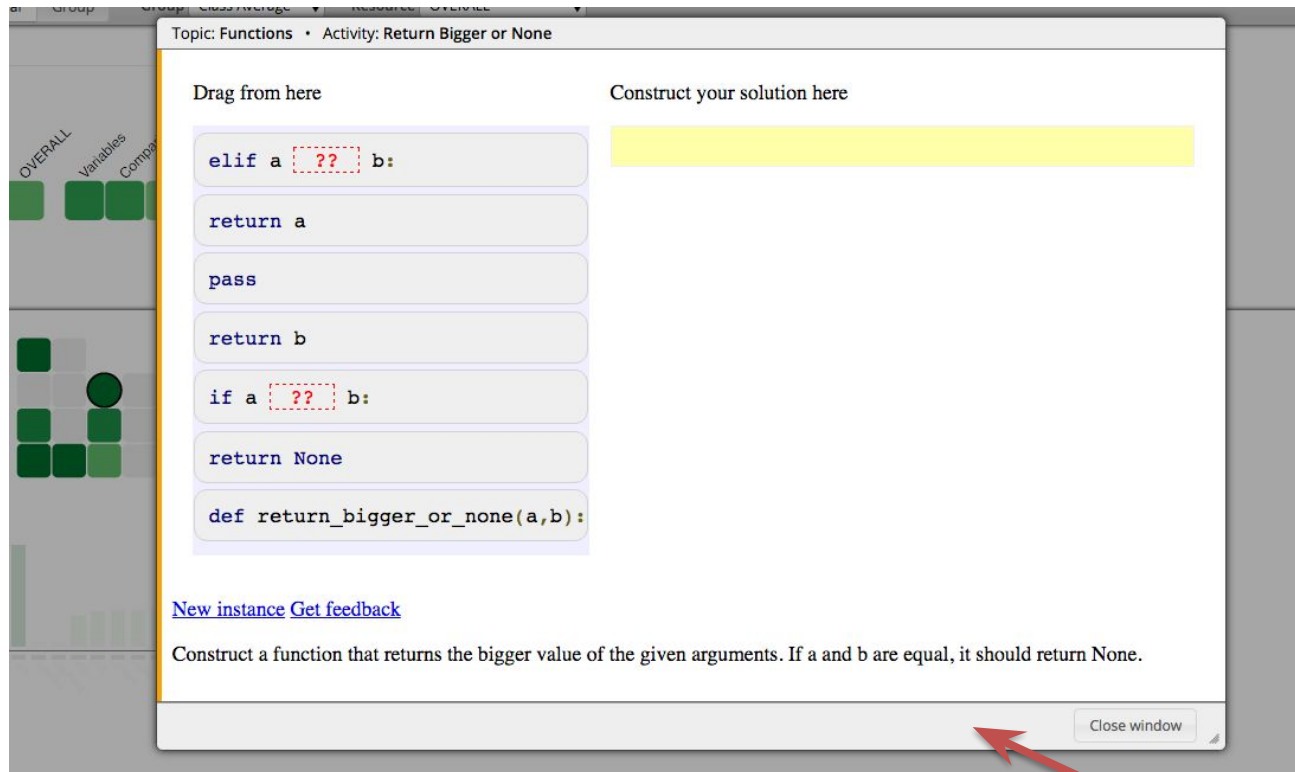

Mousing over this activity

The gauge shows that solving the selected activity will have a strong impact in your learning (3 new concepts)

Concepts in the selected activity are highlighted

# When you click on an activity

The activity "opens" in an overlay window.
