# Mastery Grids

This tool is a visualization of your progress in a set of content organized in topics.

These cells shows your progress in the topics of the course

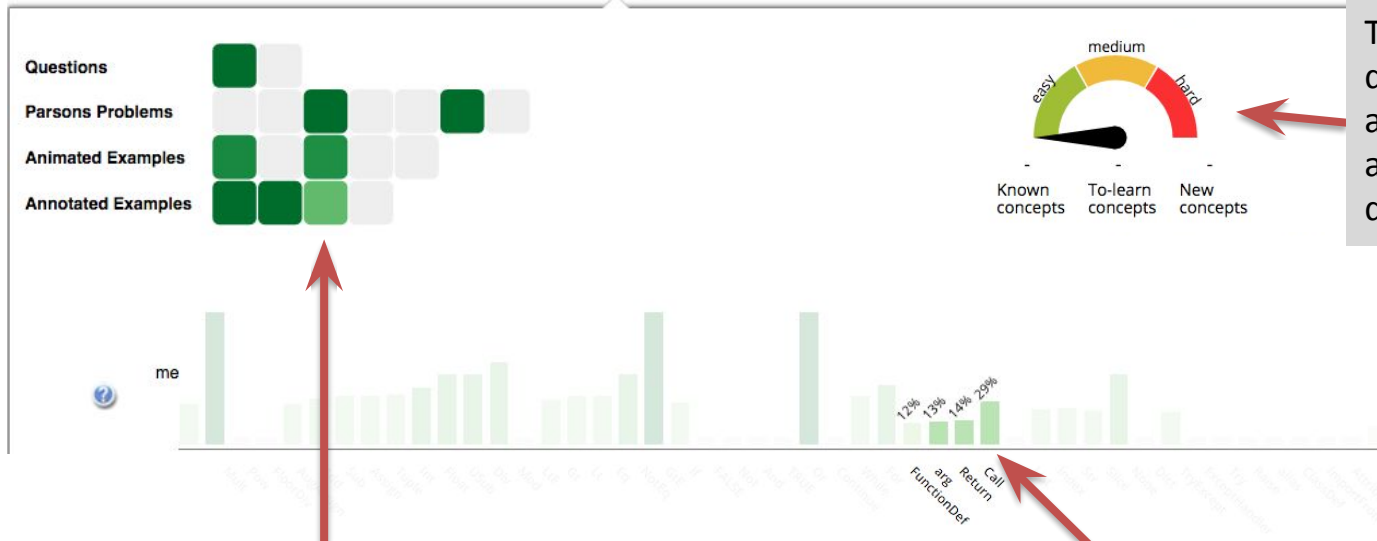

Each topic has several concepts associated to it. Mouseover a topic to highlight its concepts

This bar chart shows your progress in Python concepts

# When you click in a topic cell:

An overlay pane opens indicating which topic you are inspecting (in this case the topic "Functions")

This gauge estimates the difficulty of a selected activity. Mouse over activities to see how difficult they are.

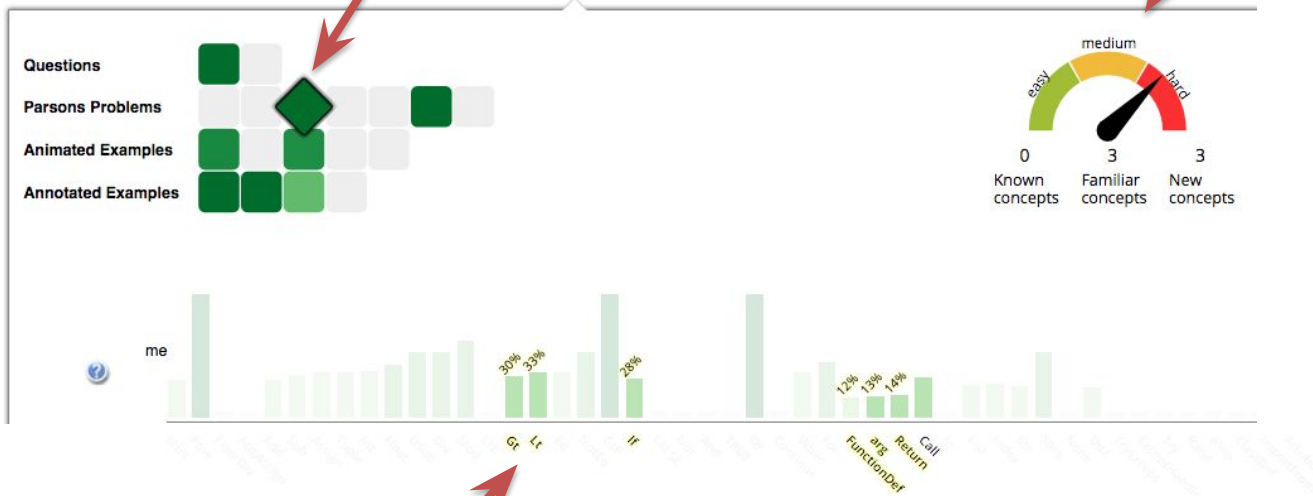

These are the "activities". As you complete them, you gain progress and cells become greener.

The concepts within the selected topic are highlighted

# When you mouseover an activity

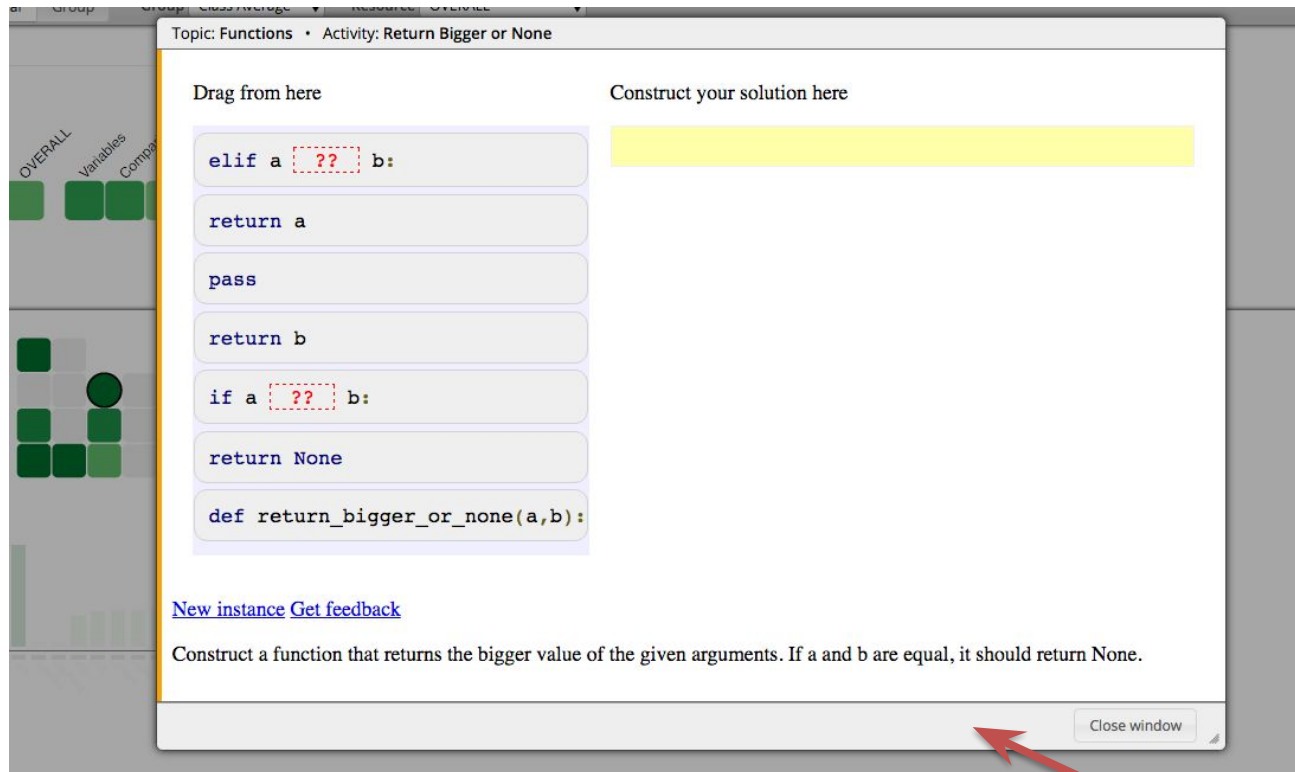

Mousing over this activity

The gauge shows this is a "hard" activity, based on the level of completion of its concepts. Concepts with low progress are considered "new".

Concepts in the selected activity are highlighted

# When you click on an activity

The activity "opens" in an overlay window.
